

C-NOTE (CNOTE) COIN WHITEPAPER

Version: 1.0

Release Date: 31.05.2025

Website: <https://cnote-chain.com>

GitHub: <https://github.com/cnote-chain>

1. Executive Summary

C-NOTE (CNOTE) Coin is a next-generation, ultra-scarce cryptocurrency engineered to emulate the characteristics of sound money with a limited, transparent supply and deflationary design. Built on a hybrid PoW-PoS blockchain with masternode infrastructure, C-NOTE is positioned as the “Gold Standard of Digital Assets,” offering exceptional long-term value storage, passive income opportunities, and a minimal-inflation framework.

With only **100,000 total coins** and a carefully structured reward distribution, C-NOTE delivers the rarity and security demanded by modern investors and institutions.

2. Vision and Mission

Vision: To establish C-NOTE as the digital gold of the crypto ecosystem—a scarce, secure, and stable cryptocurrency that delivers trust and longevity.

Mission: To create a decentralized monetary asset that enables users globally to store value securely, earn passively, and participate in a rare economic system resistant to inflation and manipulation.

3. Key Features

- **Fixed Maximum Supply:** 100,000 CNOTE coins
- **No Inflation:** Ultra-low emission model with fixed annual release (100 CNOTE/year)
- **Zero Transaction Fees:** Efficient and frictionless
- **Hybrid Blockchain:** PoW to PoS transition for sustainability
- **Masternode Network:** Decentralized governance and block validation
- **Non-Custodial Architecture:** No online wallet storage or private key exposure

4. Technology Overview

4.1 Blockchain Protocol

- Consensus: Hybrid Proof-of-Work (PoW) and Proof-of-Stake (PoS)
- Block Time: 60 seconds
- Coin Maturity: 60 blocks
- Network Confirmation: 6 confirmations
- Stake Age: 24 hours
- Premine: 1,000 CNOTE (Block 1)
- Total Supply: 100,000 CNOTE

4.2 Proof-of-Work Phase

- Blocks: 2 – 2000
- Purpose: Fair launch and initial distribution

4.3 Proof-of-Stake Phase

- Starts at Block 2001
- Reward per block: 0.0000015 CNOTE
- Eco-friendly model promoting long-term holding

4.4 Masternodes

- Collateral Requirement: 2 CNOTE
- Reward per block: 0.00000131 CNOTE
- Function: Enhanced transaction validation and network stability

5. Tokenomics

Category	Value
Total Supply	100,000 CNOTE
Annual Release	100 CNOTE
Premine	1,000 CNOTE
Masternode Reward	0.00000131 CNOTE/block
Staking Reward	0.00000019 CNOTE/block
Transaction Fees	0

6. Use Cases & Utilities

6.1 Digital Store of Value

CNOTE's scarcity and zero inflation make it ideal for storing wealth in a secure digital format.

6.2 Passive Income

Through staking and masternode operation, users earn steady rewards while helping to secure the network.

6.3 Treasury Instrument Integration

Future developments include integration into digital treasury investment platforms where discounted interest is paid upfront in USDT, and capital is locked in CNOTE for long-term returns.

6.4 Enterprise Reserve Asset

A stable, non-inflationary asset that institutions can hold as part of a diversified digital treasury.

7. Roadmap

Milestone	Status
Core Blockchain Launch	Completed
Wallet Release (Win/Mac/Linux)	Completed
Masternode Infrastructure	Completed
Community & Ambassador Programs	Ongoing
Integration with Treasury Platform	In Progress
Exchange Listings	Planned
Mobile Wallet Support	Planned
DAO Governance	Planned

8. Wallets & Infrastructure

Wallet binaries are available for: - **Windows** - **macOS** - **Linux**

9. Governance and Sustainability

CNOTE will evolve into a **decentralized autonomous network**, driven by masternode votes and community proposals. This ensures transparency, fairness, and resilience against central control.

10. Compliance and Security

- No storage of private keys on servers
- All wallet operations are non-custodial
- 2FA implementation for secure user access
- Codebase is open-source and regularly audited

11. Community and Ecosystem
